## PROFESSIONAL EXPERIENCE

**KPIInterface** | Limerick, PA

May 2024 – Present

*Cyber Security Intern*

- Primary responsibilities included monitoring and analyzing security incidents, conducting threat assessments, and implementing security measures to protect client's digital assets
- Producing best results in a proactive approach to cybersecurity, consistently striving to enhance the security framework for over 100 small and medium sized businesses in the greater Philadelphia area
- Conducted onsite and internal audit assessments for a variety of sectors such as Financial Services, Manufacturing, and Tech. Compliance Frameworks including SOX, CMMC, SOC 2, and ISO 27001

## PROJECTS

- Currently Leading a team of VT undergraduates as a hardware lead in building an app that uses cameras around campus and Google Cloud AI image recognition to tell users of the where there is available parking. As the hardware lead, I work with setting up the cameras in a Vertex AI environment to determine the number of cars currently in the parking lot  
[github.com/lukegallagher212](https://github.com/lukegallagher212)
- Various in-class projects including a fully automated tower of Hanoi solver that can take an input of any number of disks to solve with, most projects being done in Java
